

Location of Animals

Print. Fill in blanks. Put with disaster paperwork.

Evacuating can be stressful, especially when you have little time to locate, gather, confine and transport animals to safety. This checklist will help you identify all the animals you are responsible for and where they can be found the majority of the time, in your home or on your property. It may seem unlikely you would forget an animal, but it has happened when people are panicking and not thinking clearly.

Dogs

Total _____

Date Updated: _____
