

# WILDFIRE RECOVERY AND RESILIENCE STUDY

Natural Hazards Center

## INFORMATION

Researchers from the University of Southern California, in collaboration with the Happy Camp Community Center and The R.I.S.E Collaborative, are conducting a Natural Hazards Center study to better understand the factors that contribute to community resilience and recovery after wildfires. This project seeks to gather information from the community to help support the creation of positive recovery pathways for rural communities.

### FOCUS GROUP PARTICIPATION

Focus groups will be held [INSERT TIME/PLACE] with Happy Camp adults, youth, and key individuals to ask about their recovery experience.

We want to know:

- Your thoughts on recovery efforts
- Your goals for the future
- What parts of the recovery are working?
- Where are there opportunities to make recovery better?

### QUESTIONS OR THOUGHTS?

Please contact:

#### Abigail Yeager

Executive Director  
Happy Camp  
Community Action
